A STATISTICAL PROFILE OF THE NSW BAR

INTRODUCTION

The purpose of this update is to provide an up to date statistics due to the appointment of the new silks* on 1 October 2002.

The statistics in this update are separated into the following three sections:

1. Members of the NSW Bar Association;
2. Practising Bar Association Members – NSW only;
3. All Holders of NSW Practising Certificates;

The data is sourced from the PC and membership database maintained by the NSW Bar Association.

All information held by the NSW Bar Association has been provided by individual barrister's or their staff. Where the Association becomes aware of a change, that change is noted on the database. Further, each year during practising certificate renewals, all barristers are asked to formally confirm the data held about them by the Association.

The current year's data is 'real time'. Daily changes are made to the membership database as information is received. Whilst daily changes may be minimal, a number of major changes occur each year to the database. These are the renewal of practising certificates in July, the appointment of new Silks in October, and the natural transitions of the Bar such as retirements at the end of the calendar year.

It should be noted that the NSW Bar Association database (as with most databases) has limitations and that some data in this update may contain insignificant errors.

* **NOTE:** Senior Counsel (QC and SC) are commonly called 'silks'. SCs have been appointed since 1993 and replaced the appointment of Queen's Counsel. The term 'junior' barrister means all barristers except those who have been appointed Senior Counsel (QC or SC). The term 'junior barrister' does not indicate the ability or number of years at the Bar; for example some 'juniors' have been practising for 30 years.
